

## Dave Gordon

Executive Vice President – Chief Digital & Information Officer

Dave Gordon is Executive Vice President and Chief Digital & Information Officer for Northwestern Mutual. Gordon is responsible for all aspects of the company's technology and digital teams, including Artificial Intelligence (AI), software engineering, data engineering, digital product & design, enterprise architecture, infrastructure & cloud services, and information risk & cybersecurity.

Gordon previously served as Chief Technology Officer for Northwestern Mutual. In this role, he oversaw all software development for the company's customer experience, digitally enabled products, and corporate solutions. He was also responsible for software engineering modernization to accelerate delivery of Northwestern Mutual's digital transformation and business performance.

Prior to joining Northwestern Mutual, Gordon held senior positions leading technology organizations at USAA Federal Savings Bank and BMO Harris Bank. Earlier in his career, he spent more than 13 years at Capital One in progressive strategic roles during the hyper-growth years of the company.

With more than 30 years of experience, Gordon has a proven track record of successfully leading and advancing technology capabilities at large financial services companies. His background includes establishing proven technology management practices spanning Agile delivery, technology investment portfolio management, technology governance, vendor management, product management, and IT risk management. He has deployed technology advancements including modern software development practices, cloud-native applications, AI-driven data solutions, data center consolidations, and technology integrations associated with large corporate acquisitions.

Gordon holds an MBA from the University of Richmond and a Bachelors in Computer Science from Indiana University.
